

SENIOR SYSTEM ENGINEER (F/M)

ARGUS DATA INSIGHTS Schweiz is the leading provider of media intelligence solutions in Switzerland and has its head office in Zurich. Around 190 media and communication experts find, analyse and consolidate relevant media content into high-quality analyses and media reviews to be used for making well-informed marketing, communication and strategy decisions.

We are looking for a dedicated **Senior System Engineer (f/m)** to join our IT infrastructure team. Start date: immediately or by agreement.

YOUR TASKS

As part of our IT infrastructure team, you will be responsible for the smooth running of our entire IT infrastructure and data centre. Your remit will focus on the following key points:

- Being jointly responsible for the content and expansion of the Windows and Linux server environment, the storage environment, server virtualisation and the Windows-based workstations
- Developing and implementing technical concepts, plus managing project implementation where required
- Processing error and fault reports from our internal and external IT users
- Monitoring and analysing error statuses and defining action plans to resolve them

YOUR PROFILE

As an independent and service-focused person, you will have the following:

- An IT qualification (degree, vocational degree, completed MCSA/MCSE, ICT Supporter SIZ or similar)
- Numerous years of experience in the engineering and maintenance of Windows and Unix server systems
- Sound knowledge and proven experience of Hyper-V virtualisation
- Sound knowledge of Linux environments an advantage
- Experience with networks, firewalls, storage systems, Active Directory, Office365 and Microsoft Azure
- The ability to independently develop and implement IT infrastructure concepts
- Enthusiasm, resilience and flexibility
- Knowledge of German an advantage

WHAT WE OFFER

An exciting job with new technologies in a team of skilled system engineers in a friendly working environment. We have a culture of open dialogue, flat hierarchies and fast decision-making pathways. Your modern workplace is near Sihlcity with excellent links to public transport.
